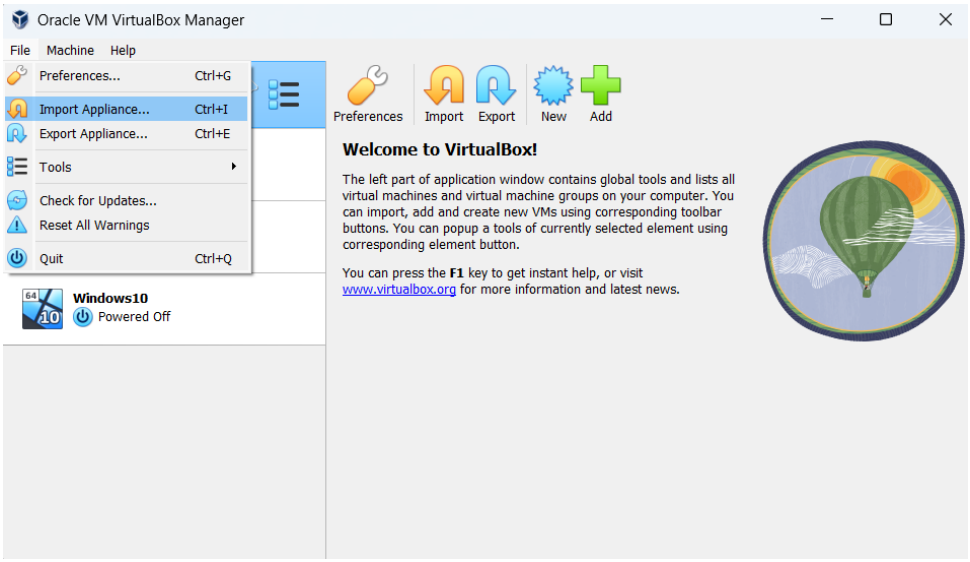
Worcester Polytechnic Institute

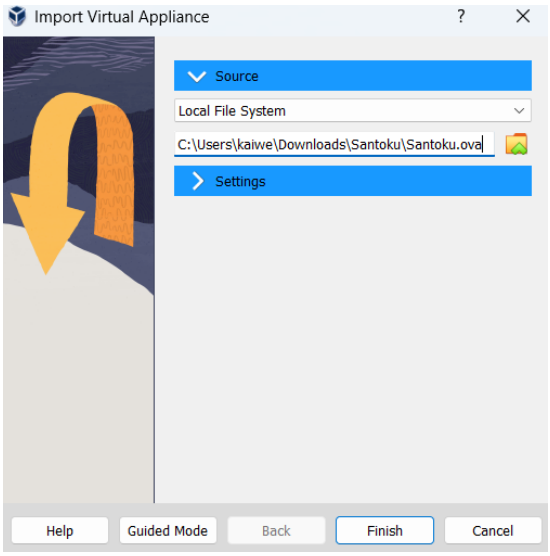
Department of Computer Science

Module 0: Santoku installation instruction

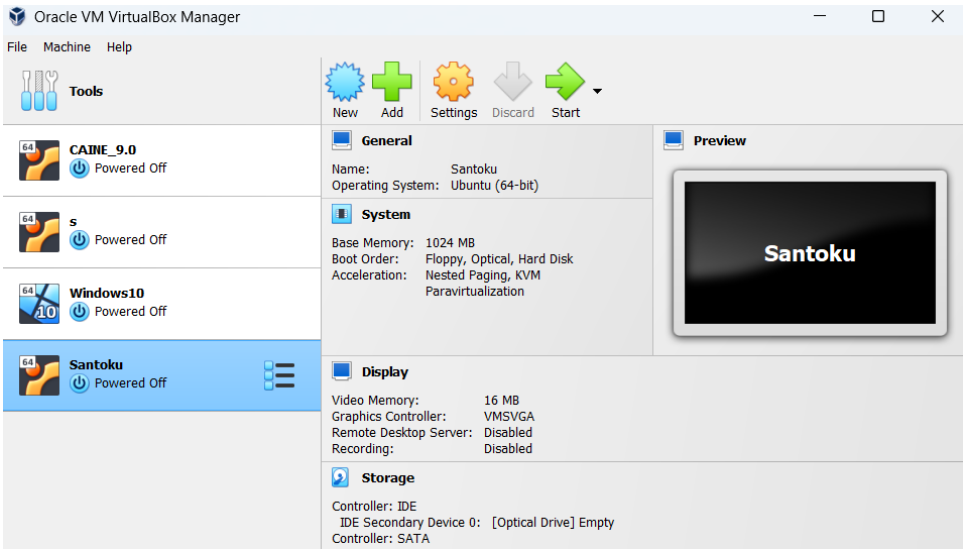
1. Download the Santoku.ova virtual machine.

2. Open the Virtual Box and then click **“File” -> choose “Import Appliance...”**, and then choose the destination folder and target file, and then click **“Finish”**. And the virtual machine will be imported.





3. After importing the Santoku virtual machine, click **“Start”** (The green arrow) to start the virtual machine.



4. After opening the virtual machine, enter the password **santoku** and then click “Log in”.

(Please note the password is in lowercase).

And this is the main page of the Santoku virtual machine. (Please note: if there is any prompt to let you upgrade the system, please ignore the prompt and close it. Please do not upgrade the system).
